

Freelancer Automation

Readiness Check

12 checks across the 3 systems that quietly cost freelancers the most time and money: inbox triage, quote capture, and client follow-up. Answer honestly — this isn't graded.

RUN DATE _____ OPERATOR _____ BUILD FREELANCER-OPS-CHECK V1.0

How to run this check: for each item, tick the box only if it's *consistently* true — not "true when I remember." Leave it unticked if you hesitated. At the end, count the unticked boxes per system and read your result on page 2.

● SERVICE: INBOX TRIAGE

SYS.A / 4
CHECKS

- A1 ☐ I can tell which incoming email is genuinely urgent without opening the full inbox.
- A2 ☐ I have never missed a deadline because an important email got buried under newsletters or CC threads.
- A3 ☐ Incoming mail is automatically labelled or routed by priority — I don't sort it by hand.
- A4 ☐ My daily inbox triage takes under 15 minutes, every day, not just on good days.

● SERVICE: QUOTE CAPTURE

SYS.B / 4
CHECKS

- B1 ☐ I reply to every quote request in under one hour, without exception.
- B2 ☐ Every quote request lands in one place — not scattered across email, WhatsApp, and DMs.
- B3 ☐ I have never lost a client because I replied too slowly to their first enquiry.
- B4 ☐ An automatic confirmation goes out the moment someone requests a quote, before I even see it.

● SERVICE: CLIENT FOLLOW-UP

SYS.C / 4
CHECKS

- C1 ☐ I know exactly how many leads are "awaiting reply" right now, without opening anything.
- C2 ☐ A lead who goes quiet for 3 days gets an automatic follow-up — I don't have to remember to chase.
- C3 ☐ I can state this month's revenue from new vs. returning clients without opening a spreadsheet and thinking hard.
- C4 ☐ I have never simply forgotten to follow up with a hot lead.

SCORING

Count the **unticked** boxes in each system (A, B, C separately), then read your diagnosis on the next page.

Diagnosis & Fix

Find the system with the most unticked boxes below — that's your bottleneck. If you scored 6 or more unticked across all three systems, skip to the bundle.

RESULT	WHAT IT MEANS	FIX	WHERE
● 2+ unticked in SYS.A	Inbox triage is manual and it's eating your mornings. Urgent messages are found by luck, not by system.	Email Urgency Classifier €19	paulosilvajr.gumroad.com/l/n8n-email-urgency-classifier
● 2+ unticked in SYS.B	Quote requests are your revenue's front door, and it's currently unattended. Every slow reply is a lead you didn't have to lose.	Quote Request Automator €19	paulosilvajr.gumroad.com/l/quote-request-automator
● 2+ unticked in SYS.C	Leads are going cold because nothing is chasing them but your memory. A pipeline you can't see is a pipeline you can't trust.	CRM + Sheets + Follow-ups €29	paulosilvajr.gumroad.com/l/n8n-CRM-GoogleSheets-Automated-Follow-ups
● 6+ unticked overall	All three systems have real gaps. Fixing them one at a time will cost more than fixing them together.	Complete Automation Pack (bundle) €49	paulosilvajr.gumroad.com/l/complete-n8n-freelancer-automation-pack

Re-run this monthly. Systems drift — a "yes" today can quietly become a "no" in eight weeks as your client load changes. Bookmark this PDF and re-score yourself once a month.
